

SENTINEL-AI: CYBER FORENSIC REPORT

Advanced Threat Intelligence & Pattern Recognition Analysis

STEP 1: Target Identification

Target Input: https://google.com.security-update.xyz/

Forensic ID: SENT-EA38F358

Scan Timestamp: 2026-05-11 21:18:03

STEP 2: Risk Scoring & Metrics

AI Risk Score: 100/100

Threat Verdict: BLOCKED (CRITICAL THREAT)

STEP 3: Forensic Detection Steps

The Sentinel-AI engine performed a multi-layer heuristic scan on the provided input. The following malicious patterns were identified:

- [1] DETECTED: Brand Impersonation Signature: Unauthorized use of trusted subdomains
- [2] DETECTED: Social Engineering Pattern: Phishing-centric keywords identified in URI

Conclusion: Based on the identified patterns (Obfuscation, SQLi, or Deceptive Links), this input is classified as **BLOCKED (CRITICAL THREAT)**. Access has been restricted to prevent potential system compromise.
